Summary

Multifaceted Mobile Application Developer with 5+ years of experience, having extensive knowledge from online banking and customized business solutions to multi-platform mobile games. I am a dynamic team leader who can train, coach and mentor world-class technology team.

- Expertise in Mobile Application Development (iOS, Windows Phone)
- Games Development using Cocos-2D, NG-Core
- Windows Store Application Development (Win 8.1/10)
- REST and SOAP based webservice integration
- Domain expertise in ADC Channels (Internet Banking, Mobile Banking, AST)
- Loan Origination Systems (Credit Cards, Personal Finance)
- Financial CRM training using MS Dynamic CRM 2015
- Agile Methodologies and SCRUM (JIRA, HP Quality Center, Unfuddle)
- Working experience under Apple & Microsoft development team

Work History

Lead Mobile Developer   2014 Jan - Present

Veripark Gulf

I am working as Sr. Mobile Application Developer for Retail Banking Product, who is responsible for doing requirement analysis, app development, documentation, deployment and production support. Troubleshooting and maintenance of change requests are also part of my job duties.

Software Engineer   2013 Jan - 2014

Arbisoft

I worked as a Sr. Software Engineer for highly scalable customized business solution. My core responsibilities included requirement analysis, mobile application development, deployment and support. I follow Agile Development and SCRUM to ensure smooth product life cycle. Client communication and cross team coordination were also part of my duties.

Software Engineer   2011 - 2013

Gameview Studios

I worked as a Mobile Game Developer for around 2 years. I was responsible for requirement analysis, games product development, creating functional specs and production support. I was working in agile model using JIRA and Unfuddle. Client communication and cross team coordination was also part of my duties.
